| 1               | 1      | Option 1 = Tuesday*  
|                 |        | Option 2 = Wednesday  
|                 |        | Option 3 = Thursday  
|                 |        | Option 4 = Friday |
| 2               | 1      | Option 1 = left*  
|                 |        | Option 2 = 2nd left  
|                 |        | Option 3 = 3rd left  
|                 |        | Option 4 = right |
| 3               | 4      | Option 1 = plus 76 equals  
|                 |        | Option 2 = minus 76 equals  
|                 |        | Option 3 = times 76 equals  
|                 |        | Option 4 = divide 76 equals* |
| 4               | 2      | Option 1 = 25.78 seconds  
|                 |        | Option 2 = 25.91 seconds*  
|                 |        | Option 3 = 26.31 seconds  
|                 |        | Option 4 = 26.92 seconds |
| 5               | 4      | Option 1 = 7 chances in 8  
|                 |        | Option 2 = 8 chances in 8  
|                 |        | Option 3 = 1 chance in 7  
|                 |        | Option 4 = 1 chance in 8* |
| 6               | 1      | Option 1 = left*  
|                 |        | Option 2 = 2nd left  
|                 |        | Option 3 = 3rd left  
|                 |        | Option 4 = right |
| 7               | 3      | Option 1 = $6  
|                 |        | Option 2 = $5  
|                 |        | Option 3 = $4*  
|                 |        | Option 4 = $3 |
| 8               | 2      | Option 1 = 4 square metres  
|                 |        | Option 2 = 8 square metres*  
|                 |        | Option 3 = 16 square metres  
|                 |        | Option 4 = 21 square metres |
| 9               | 2      | Option 1 = 200 mL  
|                 |        | Option 2 = 250 mL*  
|                 |        | Option 3 = 300 mL  
|                 |        | Option 4 = 750 mL |
| 10              | 1      | Option 1 = As the ticket price goes up, attendance goes down.*  
|                 |        | Option 2 = As the ticket price goes up, attendance goes up.  
|                 |        | Option 3 = As the ticket price goes down, attendance goes down.  
<p>|                 |        | Option 4 = As the ticket price goes down, attendance stays the same. |
| 11              | 3      | Option 1 = 6:20 PM |</p>
